

## outdoor dust control systems

Dust Control for outdoor shredding and screens. At last the mobile answer to dust from exposed screens and shredders without the use of fog cannons. Low water and power usage. A system that can be adapted to any static or mobile shredder or screen system indoors or out.

Bowser Rain Gun System - Range 70m

Exterior Misting Screen

Biomass, Waste to Power, Wood Recycling

## why mist-air is best...

- ✓ We survey your site free of charge, and then send you a site plan and our recommendations.
- ✓ If you agree, our engineers will install the system within 2 days, without disrupting your operations.
- ✓ We manufacture from all stainless steel and non ferrous materials, so no corrosion or blocked jets.
- ✓ The system can be moved, expanded, or altered very easily as your business grows.
- ✓ 2 year parts and labour warranty with a 20 year corrosion warranty.
- ✓ Money back guarantee if you are not 100% satisfied with the finished system.

The **mist-air** system should not to be confused with lines of misting nozzles in the roof or rotary atomisers, which are inefficient and wet stock and floors.

**mist-air** patented system nozzles do not block. This is a problem which is associated with inferior systems.

A single small Base Unit can supply many fan units, covering perhaps just a single shredder or many different areas or buildings simultaneously, each area having independent controls.

- ✓ Virtually no running costs
- ✓ Inexpensive and fast to install and maintain
- ✓ Many thousands of systems satisfactorily installed across Europe

## dust and odour suppression systems

### TELL US YOUR PROBLEM?

### We're Your One Stop Solution for Dust, Dirt & Odour...

Our systems suppress dust and odours in any environment indoors or outside and of all sizes without wetting floors, stock or machinery.

## dust & odour control systems

Fan assisted manifolds can typically be mounted on roof girders to blow dry fog towards forming dust. This fog suppresses the dust immediately without wetting floors, stock, machinery or personnel & prevents it migrating to other areas.

For Transfer Points, Ballistic Separators, Trommels in WTS's

For Conveyor Transfer Points, Bulker Loading

For Loading Hoppers

## industry leaders in dust suppression & odour absorption technology.

### mist-air consumables

#### odour absorber

Mist-Air Odour Absorber kills odours immediately.

This unique product is manufactured by Mist-Air and used extensively throughout Europe for curing odour issues in waste recycling sites, storage bunkers, landfill sites etc.

The product contains no essential oils so cannot gunge up systems & does not affect eyes, or throat. It is safe, effective & economical. It can be added to any misting/fogging system and is suitable for indoor & perimeter misting.

Uses include stored food waste, composting, landfill etc.

## wheel wash systems

Deals with all types of soiling. Suitable from a few lorries, up to 2000 a day. Units available for 80 ton military tanks, etc. Temporary above ground or permanent in ground systems. For use in construction sites, quarries, steelworks, landfills...

## rain gun systems

For roads, yards, and stockpiles. Automatically dampens any size of yard, stockpile or road system. The effective answer for dust blown by wind and vehicle movements.

## mistral power washers

Industrial Power Washers for constant hard use. Tough engineering perfected over 40 years. Guaranteed 10 years.
