

Mistral Power Washing Equipment

COLD WATER ENGINE DRIVEN POWER WASHERS

Designed for hard work and a long life ensuring many years of power washing, but without the need for an electric power supply. Easily moved from site to site, with the capability to suck from convenient water sources or a hose pipe.

Petrol Engine Models

Powered by reliable Honda four stroke petrol engines, slowly driving 3 plungers positive displacement pumps through reduction gearboxes, which allows this machine to suck from any convenient water source. Easily transported and moved around site.

Diesel Engine Models

Powered by single cylinder Lombardini or Ruggerini diesel engines, with the added bonus of fuel economy.

Technical Specification						
Model	Engine	Make	Fuel	Pressure	Flow	Drive
1800PC	5.5 hp.	Honda	Petrol	1800 psi.	13 lpm.	Reduction Gearbox
3000PC	11 hp.	Honda	Petrol	3000 psi.	15 lpm.	Reduction Gearbox
1800DC	8 hp.	Lombardini	Diesel	1800 psi.	13 lpm.	Reduction Gearbox
3000DC	13 hp.	Lombardini	Diesel	3000 psi.	15 lpm.	Reduction Gearbox
Average Dimensions						
<i>Length: 1200 mm Width: 800 mm Height: 900 mm Weight 85 kg.</i>						

Supplied with:

- Hand gun and 900 mm insulated lance
- 9 meters / 30 feet of high pressure hose fitted with quick release connections
